1. Cyclical update on input data delivery for CEEplus calculation

Members were updated on input data delivery for CEEplus calculation, where no serious issues were encountered.

2. Update on GPW Benchmark works on ESG-based indices

Upon presentation of a material on ESG-related project of the GPW Benchmark and climate data availability by Adam Błasiak, Members shared concerns about the current lack of a) sufficient ESG and climate-related reporting data on CEE issuers, as well as b) sufficiently clear standards/guidelines of ESG-based index methodology in case of limited publicly available data.

This poses challenges to meet the immense requirements for ESG-indices imposed by the benchmark regulations in the EU. The Oversight Committee will look into that matter again in 2023 to further analyze the potential for a CEEplus-ESG index.

Next meeting to be held on 15 Dec., 2022.
